**Phil Mesman**  
Portfolio Manager, Co-  
Head Fixed Income

**Sam Acton**  
Portfolio Manager, Co-  
Head Fixed Income

### Investment Objective

The investment objective of the Picton Mahoney Fortified Special Situations Alternative Fund is to maximize total return to unitholders through income and capital appreciation by investing primarily in event-driven situations in global fixed income while mitigating capital loss through shorting and other hedging strategies.

### Why Invest

#### Unique Source of Return

Through long short event-driven investing that aims to have low correlation to major markets.

#### Benefit From Proven Managers

With experience running Authentic Hedge® strategies for over a decade.

#### Add Hedging Tools

Designed to hedge the risks associated with income investing such as capital loss.

This material is intended for use by Investment Advisors.

There is no guarantee that a hedging strategy will be effective or achieve its intended effect. The use of derivatives or short selling carries several risks which may restrict a strategy in realizing its profits, limiting its losses, or, which cause a strategy to realize a loss. There may be additional costs and expenses associated with the use of derivatives and short selling in a hedging strategy.

This is provided as a general source of information, is subject to change without notification and should not be construed as investment advice. This material should not be relied upon for any investment decision and is not a recommendation, solicitation or offering of any security in any jurisdiction.

Commissions, trailing commissions, management fees, performance fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Alternative funds can only be purchased through a registered dealer and are available only in those jurisdictions where they may be lawfully offered for sale.

Investment Risk Rating is the historical volatility risk as measured by the standard deviation of fund performance, which is the standard methodology outlined in Appendix F Investment Risk Classification Methodology to NI 81-102 Investment Funds.
